INTRODUCTORY REMARKS

General Conference Chair

BEYOND USER INTERFACES: CRAFTING INTELLIGENT, HUMAN-CENTRIC DIGITAL EXPERIENCES

Dr. Kay Stanney

Design Interactive, USA

Keynote Summary: The keynote will explore the dynamic intersection of human-centered design and artificial intelligence (AI), examining how design has evolved to better meet user needs in an increasingly digital world. It will highlight the transformative role of AI in enhancing user experiences through predictive analytics, personalized interfaces, and more. The talk will also explore how the integration of AI with the Internet of Things (IoT) and massive sensor data can create a more seamless and symbiotic relationship between humans and systems. This includes discussing the potential benefits, such as improved efficiency and user satisfaction, as well as the possible drawbacks, including privacy concerns and the risk of over-reliance on technology. By addressing these aspects, the keynote aims to provide a comprehensive view of the opportunities and challenges in achieving a harmonious balance between human-centered design and AI in the era of rapid digital transformation.

Bio: Kay Stanney is CEO and Founder of Design Interactive, a company dedicated to empowering people through innovative technology. She is a leading figure in eXtended Reality (XR) systems, focusing on cybersickness, training, and human performance. Her research has significantly influenced the design of XR headsets and immersive experiences for Universal Studios, Disney, Chevron, Procter & Gamble, and military applications. In 2019, she was inducted into the National Academy of Engineering for her contributions to human factors engineering and virtual reality. Dr. Stanney has been instrumental in formalizing XR research and development, serving as editor of the Handbook of Virtual Environments and co-founding key conferences and groups in the field.

**Access to the Conference Scientific and Technical Program
will be available through the AHFE Submission System**

CONFERENCE RECEPTION: SATURDAY, JULY 26, 2025 • 18:30-22:00 (EDT)
JW MARRIOTT ORLANDO BONNET CREEK RESORT
(BADGE REQUIRED)

Tutorials

Conference program schedule is listed in Eastern Daylight Time (EDT) - Florida Timezone

PRE-CONFERENCE TUTORIALS

Half-day tutorials at introductory, intermediate, and advanced levels will cover the entire spectrum of the conference. Tutorials will be offered on July 26, 2025. Tutorial registration is required. Tutorial coffee breaks on July 26 will be held in the Foyer.

JULY 26, 2025

TUTORIAL GROUP A - 9:00 - 11:30 (EDT)		Room
T-1	Ubiquitous Health Monitoring and Assessment of Human Psychophysiology Using Remote Measurement and AI (Live Tutorial Onsite) Presenters: Abhijit Sarka and Lynn Abbott, Virginia Tech Transportation Institute	AHFE 1: Ibis
T-2	Fundamentals in Data Visualization and Dashboard Design (Live Tutorial Onsite) Presenter: Abbas Moallem, San Jose State University	AHFE 2: Osprey
T-4	Effective Design Reviews: How to Give and Receive Meaningful, Actionable Design Feedback (Live Tutorial Onsite) Presenter: Everett McKay, UX Design Edge	AHFE 3: Heron

JULY 26, 2025

TUTORIAL GROUP B - 12:00 - 14:00 (EDT)		Room
T-5	Great UX Design: Ten Steps to a Great User Experience (Live Tutorial Onsite) Presenter: Everett McKay, UX Design Edge	AHFE 1: Ibis
T-6	Human Factors and Cybersecurity (Live Tutorial Onsite) Presenter: Abbas Moallem, San Jose State University	AHFE 2: Osprey
T-7	Towards Data Science: Enhancing Ergonomics through Predictive Analytics (Live Tutorial Onsite) Presenter: Javed Anjum Sheikh, Fazaia College of Education for Women / Air University	AHFE 3: Heron
T-9	T-9: Eye Tracking Methods and Applications (Recorded Tutorial) Presenter: Jan Watson, Drexel University	AHFE 4: Cardinal

JULY 26, 2025

TUTORIAL GROUP C - 14:00 - 16:00 (EDT)		Room
T-10	Human-Centered and Explainable AI: Foundations and Applications in Medicine (Live Tutorial Onsite) Presenter: Rayan Ebnali Harari, Harvard Medical School	AHFE 1: Ibis
T-13	Designing Ergonomically Smart Workplaces with AI and User-Centered Design (Live Tutorial Onsite) Presenter: Javed Anjum Sheikh, Fazaia College of Education for Women / Air University	AHFE 2: Osprey
T-14	T-14 Cognitive Neuroscience for the Human Factors Practitioner and Fundamentals of Brain Imaging (Recorded Tutorial) Presenter: Adrian Curtin, Drexel University	AHFE 3: Heron

8	SIG: Intelligent Tutoring Systems and Generalized Intelligent Framework for Tutoring- GIFT: Applicability to Industry, Academia, and Government Co-Chairs: Lisa N. Townsend and Anne M. Sinatra, USA	HFSIM
8:30-10:00 AHFE 8: IBIS	<p>Special Interest Group (SIG) Session</p> <p>Focus: This SIG is designed to inform and engage conference participants in exploring the Generalized Intelligent Framework for Tutoring's (GIFT) tools and methods. Participants will be informed of GIFT's newest features that go beyond course creation, to include capabilities for real time multimodal assessment to inform student models and estimates of student competency. The session will include a panel of current GIFT users spanning academia, industry, and government who will showcase how they are using GIFT for ITS research and training applications.</p> <p>Objectives: Panel members will discuss how they are implementing training using GIFT and lessons learned in their domains during an in-depth interactive Q&A. The panel discussion and focused Q&A will lead to a demonstration within GIFT that is selected based on the input of the participants. GIFT users and collaborators drive the need for new capabilities and this two hour SIG event will bring new users and collaborators into the mix as the community continues to develop new features and use cases for adaptive instructional systems. Time: 8:30-16:00

Room: Griffin Grand Ballroom

Virtual Room: AHFE Posters

- A1. Correlation between headquarter placement and mirroring collected intel to gain knowledge on an adversaries headquarter location based on gender: An ISR assessment
Jenna Cotter, Justin Nelson, Samuel Johnston, Timothy Heggedahl, Justin Morgan, USA
- A2. Muscle fatigue monitoring based on detecting changes in movement variability during repetitive light material handling task: A pilot study
Kazuki Hiranai, Masaya Noguchi, Akisue Kuramoto, Motomu Nakashima, Japan
- A3. Empowering transportation electrification and grid planning: A bottom-up predictive modeling framework
Alec Zhixiao Lin, Isaac Chen Fu, USA
- A4. Adaptive HMI for cyber-physical systems: facilitating multi-level system understanding for rapid response and recovery
Caroline Kingsley, Laura Mieses, Michael Jenkins, USA
- A5. Enhancing situational awareness through an adaptive HMI haptic wearable for individualized, sensory-optimized information delivery
Michael Jenkins, Sean Kelly, Daniel Ferris, USA
- A6. Enabling and advancing adaptive HMI ecosystems for highly configurable multimodal smartphone control
Michael Jenkins, Daniel Ferris, Sean Kelly, USA
- A7. Cognitive and task predictors of naval submarine school academic performance: A pilot study
Sylvia Guillory, Anna Jane Brown, Dawn Debrodt, Chad Peltier, Jeffrey Bolkhovsky, USA
- A8. Effects of different humidity levels on the human body in a high-temperature environment at high altitude
Qing Zhang, Mengxiong Ye, Shaojun Cai, Changhua Gao, Peng Yu, Jiachen Nie, Li Ding, Qin Yang, China
- A9. Responses to and recognition of simultaneously-occurring driving hazards using auditory and visual in-vehicle alerts
Morgan McAlphin, Robert Gutzwiller, D'Mitri Seymour, USA
- A10. Information ergonomics and cognitive dissonance by AI in HUMINT/OSINT processes
Jussi Okkonen, Mika Hyytiäinen, Mia Laine, Svante Laine, Tuuli Keskinen, Markku Turunen, Finland
- A11. Piloting prejudice: Cross-cultural insights into gender and ethnic biases in the aviation industry
Sean Crouse, Stephen Rice, Samuil Nikolov, Megan Harris, Albert Bouquet, Connor Rice, Stephen Woods, Scott Winter, USA
- A12. Enhancing utility customer service and compliance: An AI-powered approach to call analysis
Jonathan Presto, Kar Wai Lee, USA
- A13. Antenna technology in energy recovery systems
Marian Wnuk, Poland
- A14. Individual characteristics using pen writing behavior: Intra- and inter-individual variability perspectives
Sugiyama Soichi, Noriyuki Kida, Japan
- A15. Assessment of a novel EMG controller training platform for a hands-free wheelchair interface
Maanya Pradeep, Delaney Gunnell, Pavan Senthil, Viviana Rivera, Peter Smith, Matt Dombrowski, John Sparkman, Albert Manero, USA
- A16. Understanding neighbor food needs and preferences through an interactive dashboard
Steven Jiang, USA
- A17. AI vs. authentic: Decoding architectural imagery
Hamid Estejab, Sara Bayramzadeh, USA
- A18. Investigation of image processing methods based on photographs for automatic posture recognition
Naoki Sugiyama, Yoshihiro Kai, Hitoshi Koda, Toru Morihara, Noriyuki Kida, Japan
- A19. A vehicle dashboard dataset towards visual complexity design
Zihao Liu, Zhizi Liu, Tao Chen, Liang Zhang, China
- A20. Cross-cultural analysis of firefighting safety attitudes, behaviors, and practices
Erik Kambarian, Philip Butler, Sabrina Cohen-hatton, Rob Honey, UK

- A21. Deception in marketing: Implications for consumer product warnings
Michael Wogalter, USA
- A22. Hybrid co-creative design process combining in-person and remote situations
Namgyu Kang, South Korea
- A23. Virtual teleportation into real spaces via digital avatars for remote collaborative design
Shinichi Fukushima, Japan
- A24. Improving airspace awareness: Possible conspicuity solutions for safe sUAS operations
Jennifer Martinez, Justin MacDonald, USA
- A25. Cooking, culture, and well-being: exploring dietary acculturation among international students in the U. S.
Swetha Anand, Le Mai Van Nguyen, Lizhu Zhang, Cecilia Xi Wang, USA
- A26. Machine learning applications in studying women healthcare.
Priyanshi Kumari, India
- A27. Virtual natural explorer: integrating AI and simulation for nature education
Yingbing Zhu, USA
- A28. Effects of human-machine interface (HMI) design on passenger trust and user experience during urban air mobility trips
Youngwoo Kim, South Korea
- A29. Balancing efficiency and well-being: The impact of AI-driven algorithmic management on retail employees
Yi Zhang, Ruiwen Zhang, Pei- Luen Patrick Rau, China
- A30. Effectiveness of pedagogic conversational agents (PCA) in the field of design education - A Chinese context perspective
Fan Chen, China
- A31. CyberAIMs, a simulation tool addressing your defense strategy in cyberspace
Erjon Zoto, Norway
- A32. XAI for detecting and explaining anomalies of IOT network traffic.
Brian Dowtin, USA
- A33. Assessing the impact of Kinect-based gait monitoring on perceived loneliness among individuals with visual disabilities
Hyung Nam Kim, Immonkhae Ugboya, Vincent Ogunmwoyoni, USA
- A34. AGENT-A/B: Advancing A/B testing in UI/UX design with a multimodal multi-agent framework
Jieyu Yang, Xin Guan, Zekun Wu, UK
- A35. Decoding digital ecosystems: The role of mobile apps as more-than-human agents
Chi Zhu, China

Joana Afonso Fernandes, Pedro Arezes, Matilde Rodrigues, Juan Carlos Rubio Romero, Judite Barbosa, M^a del Carmen Pardo Ferreira, Portugal
- B7. The impact of shoulder strap length on shoulder pressure during jumping jacks utilizing a musculoskeletal biomechanical finite element model
Jiazhen Chen, Kit Lun Yick, Yue Sun, Joanne Yip, Hong Kong SAR China
- B8. Exploratory research on nipple displacement patterns analysis during cycling and running
Yin Ching Doris Keung, Kit Lun Yick, Joanne Yip, Annie Tw Yu, Hong Kong SAR China
- B9. AI in health education: Perspectives from faculty and students at Kuwait University's Health Sciences Center
Hamad Alhamad, Sara Alrasheed, Fatemah Alobaid, Dalal Almutairi, Sara Alharban, Kuwait
- B10. Right hand, left hand, both hands: Exploring the relationship between handedness, interactivity and cognitive load in virtual reality procedural training
Fiona Duruaku, Tulsi Patel, Nathan Sonnenfeld, Blake Nguyen, Florian Jentsch, USA
- B11. Vulnerabilities & interventions in cognitive warfare: Principles/applications of 4E cognition, episodic memory, and extended reality
Nathan Sonnenfeld, Stephen Fiore, Florian Jentsch, USA
- B12. Position-specific differences in maximal voluntary contraction and rate of force development in collegiate American football players
Kei Sato, Noriyuki Kida, Japan
- B13. Biological evaluation of antimicrobial treated textiles
Alina Vladu, Emilia Visileanu, Alexandra Gabriela Ene, Madalina Georgiana Albu Kaya, Viviana Roman, Carmen Gaidau, Romania
- B14. Analysis of user acceptance and perception for external HMIs based on driving situations
Yoonkyeong Kim, Sunhong Park, South Korea
- B15. The IMPATTO project: Driving technological innovation for occupational safety and health and company performance
Gaia Vitrano, Guido J. L. Micheli, Davide Accordini, Huan Xu, Alessandro Marinaccio, Stefano Signorini, Angelo Castaldo, Alessia Marrocco, Nicolas Djukic, Francesco Pio Di Bello, Gioele D'Amore, Italy
- B16. Evaluating the impact of a sports-and-agriculture workcation on employees' well-being: A controlled study among Japanese workers
Takumi Iwaasa, Japan
- B17. Decision making in driving moral dilemmas: A driving simulator study
Dongyuan Wang, Jacqueline Miller, Pingying Zhang, USA
- B18. Evaluation model for human error response training
Yuka Banno, Yusaku Okada, Yu Shibuya, Japan
- B19. Investigation and analysis of necessary tasks and responses for unmanned automated bus in challenging situations
Naohisa Hashimoto, Yanbin Wu, Masaki Masuda, Toshihisa Sato, Japan
- B20. Evaluation of product awareness by using image n-back tasks focused on semantic memory
Masaru Kadota, Hana Muto, Asuka Miyahara, Takayuki Yamamoto, Ryo Tanaka, Hitomi Tsuchiya, Masato Kawamoto, Ippeita Dan, Japan
- B21. Invisible challenges, visible solutions: Human factors vehicle design considerations for emotional disabilities
Olivia Honan, Brandon Dreslin, Barbara Chaparro, Alex Chaparro, USA
- B22. The mediating role of teamwork in the relationship between authentic leadership and work engagement among Japanese nurses
Kentaro Inaba, Yasuyuki Hochi, Takumi Iwaasa, Yuki Mizuno, Yasuyuki Yamada, Emiko Togashi, Yumi Arai, Motoki Mizuno, Japan
- B23. Brain activation in rehabilitation of cerebrovascular disorders using VR technology
Yuki Mizuno, Shino Izutsu, Mayumi Nishikubo, Yoshihiro Hoshikawa, Japan
- B24. Event-based face anonymization for privacy-preserving vision
Maryam Moshrefizadeh, Hadi Aliakbarpour, USA

Niloofer Rahgoshay, Hadi Daneshmandi, Mozghan Seif, Roya Dokoohaki, Mina Shahbazi, Reyhane Sadeghian, Sanaz Farhadpour, Iran
- B26. Performance and reliability evaluation of 3D printer-based orthopedic implants
Lee Hyeran, South Korea
- B27. The influence of the backrest shape of mesh office chairs on comfort
Yu Na, Yingyin Deng, Xvjun Zhang, Hailin Ge, Heng Li, Zitong Li, China
- B28. Influence of audiovisual cues on older adults' performance in slider-based tasks in smart home interfaces
Na Yu, Zixuan Lian, China
- B29. Did the bumper sticker piss you off? The mediating roles of blame judgement and negative emotion between slogans and aggressive driving behaviour
Jiayan Yu, Yan Ge, Xuchi Luo, Weina Qu, China
- B30. Impact of text features on driving performance and legibility of in-vehicle screens
Jun Li, Weina Qu, China
- B31. Optimization strategies for VR game interface design based on depth perception research
Shuyang Wei, Lin Wang, Hao Fan, China
- B32. Artificial intelligence and 4D printing: Improving the design and manufacturing efficiency of wearable products
Lin Wang, Shuyang Wei, Hao Fan, China
- B33. Sitting vs. squatting: A systematic scoping review of toilet postures and associated health outcomes
Niloofer Rahgoshay, Hadi Daneshmandi, Mohammad Rahdar, Laleh Nikoo, Iran
- B34. Examining the impact of controversial paid advertisements by Youtubers on consumer boycott intentions
Jaewon Choi, South Korea
- B35. The activity of the ultrasound physician – comparative analysis between procedures using transducers in abdominal examinations and their repercussions

BOOTH	COMPANY	
101	 SMART EYE®	Smart Eye AB "Smart Eye is the global leader in Human Insight AI, technology that understands, supports and predicts human behavior in complex environments. Bridging the gap between humans and machines for a safe and sustainable future. Smart Eye was founded in 1999, is publicly traded and headquartered in Sweden with offices in the US, UK, Germany, Denmark, Egypt, Japan, Singapore and China. Through our Research Instruments, Smart Eye offers the world's most advanced eye tracking systems for analyzing human behavior. Offering unparalleled performance in complex environments, our carefully crafted instruments enable unparalleled insights into human behavior and human-machine interaction in automotive, aviation, assistive technology, media & marketing, behavioral science and many more fields."
102	 Xsens <small>a Movella™ brand</small>	Xsens (Movella) Create Safer, More Productive Work Environments with Xsens. Conventional ergonomic assessment methods are time-consuming, subjective, and often tedious. Xsens Ergonomic solutions enable the identification and prevention of musculoskeletal disorder risks, providing actionable insights to design safer and more productive work environments. Embrace a future focused on employee empowerment and well-being.
103	 MOOVENCY	MOOVENCY Moovency designs and develops solutions specialized in quantifying the risks of musculoskeletal disorders (MSDs). Using artificial intelligence and computer vision, we have developed KIMEA, a range of solutions that objectively and instantly assess the risks associated with workers' movements and postures. By detecting biomechanical constraints in real time, KIMEA reduces the risk of MSDs and sustainably improves working conditions.
105	 REVOPOINT	Revopoint International Revopoint is pushing 3D scanning technology forward to make it available for everyone because we believe access will inspire the innovators of tomorrow. Revopoint specialize in Revopoint 3D Scanning Solutions,

Human - Intelligent Systems Integration

- **Highlights research aimed at integrating people and artificial intelligence (AI)**
- **Merges the engineering perspective with the human and social dimension of AI-based technologies**
- **Covers both the technological development of intelligent engineering systems and the human dimension of AI applications across all areas of modern society**

AIMS & SCOPE

Human – Intelligent Systems Integration publishes original articles on research and development efforts intended to promote the comprehensive integration of people, intelligent engineering systems and machine learning. To help foster the design of future generations of artificial intelligence-based systems and environments, the journal focuses on novel methodologies, design tools and solutions that advance our understanding of the nature of human collaboration with intelligent machines, technologies and services, as well as other artificial cognitive systems. The Journal addresses all aspects of complex human systems integration, with a particular emphasis on intelligent systems in all domains of human activity, and on applications to industry, business, government, education, and everyday life. It attaches equal importance to human and artificial intelligence (AI), while also exploring key hardware, software and system interfaces in the technological and management processes for developing future engineering systems. It offers a truly multidisciplinary platform for researchers and practitioners alike, discussing emerging issues in the field of integration of humans and engineering systems, with a special focus on (but not limited to) AI-based technologies and human-machine learning. Its goal is to advance the theory and applications of human-AI systems collaboration, which taps into and expands on our knowledge of human-inspired design of intelligent systems. The journal also examines the human dimensions of complex cyber-physical systems and embedded artificial intelligence with applications across all domains of modern society. Selected areas and topics of interest include, but are not limited to:

- Human-Systems Integration
- Intelligent Engineering Systems
- Human Collaboration with AI-based Technologies
- Design of Artificial Cognitive Systems
- Human-AI Teaming and Collaboration / Living with AI
- Intelligent Interfaces for Human-System Integration
- Self-Organization and Human-Inspired AI Design
- Embedded Human-System Intelligence
- Intelligent Complex Systems Engineering
- Human-System Interaction: Complexity and Uncertainty
- Emergent Behaviors of Human-Cyber-Physical Systems
