

Contents

120	Part I Reducing Human Error Through Situation Awareness,	
122	Training, and Simulations	
123	Toward a Descriptive Measure of Situation Awareness	
125	in Petrochemical Refining	3
126	Tristan Grigoleit, Hector Silva, Mary Ann Burress and Dan Chiappe	
127	Full Scale Evaluation of How Task-Based Overview Displays	
128	Impact Operator Workload and Situation Awareness When	
130	in Emergency Procedure Space	15
131	Zachary Spielman, Rachael Hill, Katya LeBlanc, Brandon Rice,	
132	Gordon Bower, Jeffrey Joe and David Powers	
133	Identifying Macrocognitive Function Failures from Accident	
135	Reports: A Case Study	29
136	Peng Liu, Xi Lyu, Yongping Qiu, Juntao Hu, Jiejuan Tong	
137	and Zhizhong Li	
138	A Literature Review on Human Reliability Analysis Techniques	
140	Applied for Probabilistic Risk Assessment in the Nuclear Industry	41
141	Ninotchka Dsouza and Lixuan Lu	
142	Part II Applying Human Factors: Building Better Processes,	
143	Procedures and Organizations in Energy	
145	Developing a Human Factors Engineering Process for Control	
146	Room Upgrades	57
148	Hanna Koskinen, Jari Laarni, Leena Salo and Paula Savioja	
150	Defining Expertise in the Electric Grid Control Room	69
151	Susan Stevens Adams and Francis P. Hannigan	

152	Measurement Sufficiency Versus Completeness: Integrating Safety	
153	Cases into Verification and Validation in Nuclear Control Room	
154	Modernization	79
156	Ronald Boring and Nathan Lau	
158	Part III Human Factors in Energy	
159	Consumer Electric Energy Management Strategies and Preferences	
160	in Emergency Demand Response: Results from a Survey	93
162	Huiyang Li, Haya Salah and Ziang Zhang	
163	Exploring Observed Cognitive Error Types in Teams Working	
164	in Simulated Drilling Environments.	101
166	Margaret T Crichton, Scott Moffat and Lauren M. Crichton	
167	The Human Factor Role in the Reducing of the Power Supply	
169	Reliability.	113
170	Irina Semykina and Eugene Skrebneva	
171	Part IV Simulation and Interface Design for Safety	
172	Focused Research	
174	An Overview of the IEEE Human Factors Standard Development	
176	Activities—2016	123
177	David R. Desaulniers and Stephen Fleger	
178	The Impact of Simulation Display on Nuclear Power Plant	
180	Task Error Frequencies	133
181	Jonathan Harris, Lauren Reinerman-Jones and Grace Teo	
182	Neuropsychological Aspects Observed in a Nuclear Plant	
183	Simulator and Its Relation to Human Reliability Analysis.	145
185	André Ricardo Mendonça Pinheiro, Eugênio Anselmo Pessoa do Prado,	
186	Marcelo Ramos Martins, July Silveira Gomes and Enrique López Droguett	
187	Framework for Evaluating the Impact of Environmental Conditions	
189	on Manual Actions	159
190	Garill A. Coles, Angela C. Dalton, Kristi M. Branch, Rajiv Prasad,	
191	Nancy P. Kohn and Alvah C. Bittner	
192	A Virtual Reality Based Approach to Improve Human	
193	Performance and to Minimize Safety Risks When Operating	
194	Power Electric Systems	173
196	Alexandre Cardoso, Paulo R. Prado, Gerson F.M. Lima	
197	and Edgard Lamounier	

198	The NRC Human Performance Test Facility: An Approach	
200	to Data Collection Using Novices and a Simplified Environment	187
201	Niav Hughes, Amy D’Agostino and Lauren Reinerman-Jones	
202	Using the Human Systems Simulation Laboratory at Idaho National	
203	Laboratory for Safety Focused Research	197
205	Jeffrey C. Joe and Ronald L. Boring
